Instructions for use and safety

Cover for a 1000 l IBC tank

These instructions apply to the TEXFORCE cover intended for a standard 1000 l IBC tank. Read the instructions before first use and keep them for the entire service life of the product.

Product identification

Product identification	Cover for a 1000 l IBC tank
Brand	TEXFORCE
Model or SKU	MAUCZA1
Batch number	0005
EAN	5902414562240
Material	100% polyester with PU coating
Variant	black, 120 × 100 × 116 cm
Intended for	standard 1000 l IBC tank
Country of manufacture	China

Intended use and limitations

The cover is intended to protect a standard 1000 l IBC tank. The silver-coloured inner layer reduces the amount of light reaching the tank, while the water-resistant outer surface shields it from precipitation.

The product is not a transport tarpaulin, lifting device or load-securing device. Do not use it for any other purpose.

Construction and dimensions

The cover measures 120 × 100 × 116 cm. It has a black outer surface, a silver-coloured inner layer, removable hook-and-loop covers for the filling opening and tap, and a drawstring along the lower edge.

Material: 100% polyester with PU coating.

Fitting and use

Before fitting, compare the tank dimensions with the cover dimensions and check that the tank has no sharp edges that could damage the material.

Place the cover over the tank from above. Align the access covers with the filling opening and tap, distribute the material evenly and adjust the lower edge with the drawstring.

Close the hook-and-loop covers again after using the filling opening or tap. Never pull, lift or move the tank by the cover.

Safe use

Before each use, inspect the material, seams, hook-and-loop fasteners and drawstring. Do not use the cover if damage prevents secure fitting.

Do not climb onto the tank or stand or sit on the cover. Stand on stable ground when fitting the product.

Keep the cover and drawstring out of the reach of children. This product is not a toy.

Keep away from open flames, hot surfaces and heating appliances.

Check the drawstring before strong winds. Remove and store the cover safely if weather conditions could tear it from the tank.

Packaging warning

SUFFOCATION HAZARD. The cover is packed in plastic film, which can block the airways. Keep the film away from children, do not allow children to play with it, and dispose of it immediately after unpacking the product.

Cleaning maintenance and storage

Remove the cover from the tank before cleaning. Follow the care symbols on the product label.

Allow the cover to dry completely before folding it. Store in a dry place away from fire, heat sources and sharp objects.

Disposal of the product and packaging

Dispose of the plastic packaging and the worn cover in the appropriate waste stream in accordance with local sorting rules. Do not burn the product or its packaging.
